IMBIBE

Recipes for the Homegrown Mixologist

Developers: Valerie Fragier, Janel Jones, Mani Kaim, Timber Wylde, and James Wills

INSPIRATION

What do you want to do after a long day at work, or after
a long boot camp class?

Make a drink.

But not everyone is a bartender, or has a friend that is
readily available for to make drinks on command.

We want our app to help our users start their night out
with delicious drinks, or enjoy a night in with a drink that
suits their vibe.

ABOUT IMBIBE

Our app has elegant design, and intricate functionality, while still being user friendly.

Specifically our Mixologist app allows the user to search both alcoholic/non-alcoholic drinks based off of the ingredients used or the name of the beverage.

APP ASPECTS

Our app broken down into parts.

User Sign up

While not required if user wants to save their "favorites" by signing in their desired drinks will be stored.

Random Assortment

If unsure of what drink to search, upon clicking a button for ingredients or drinks the app will generate random drinks.
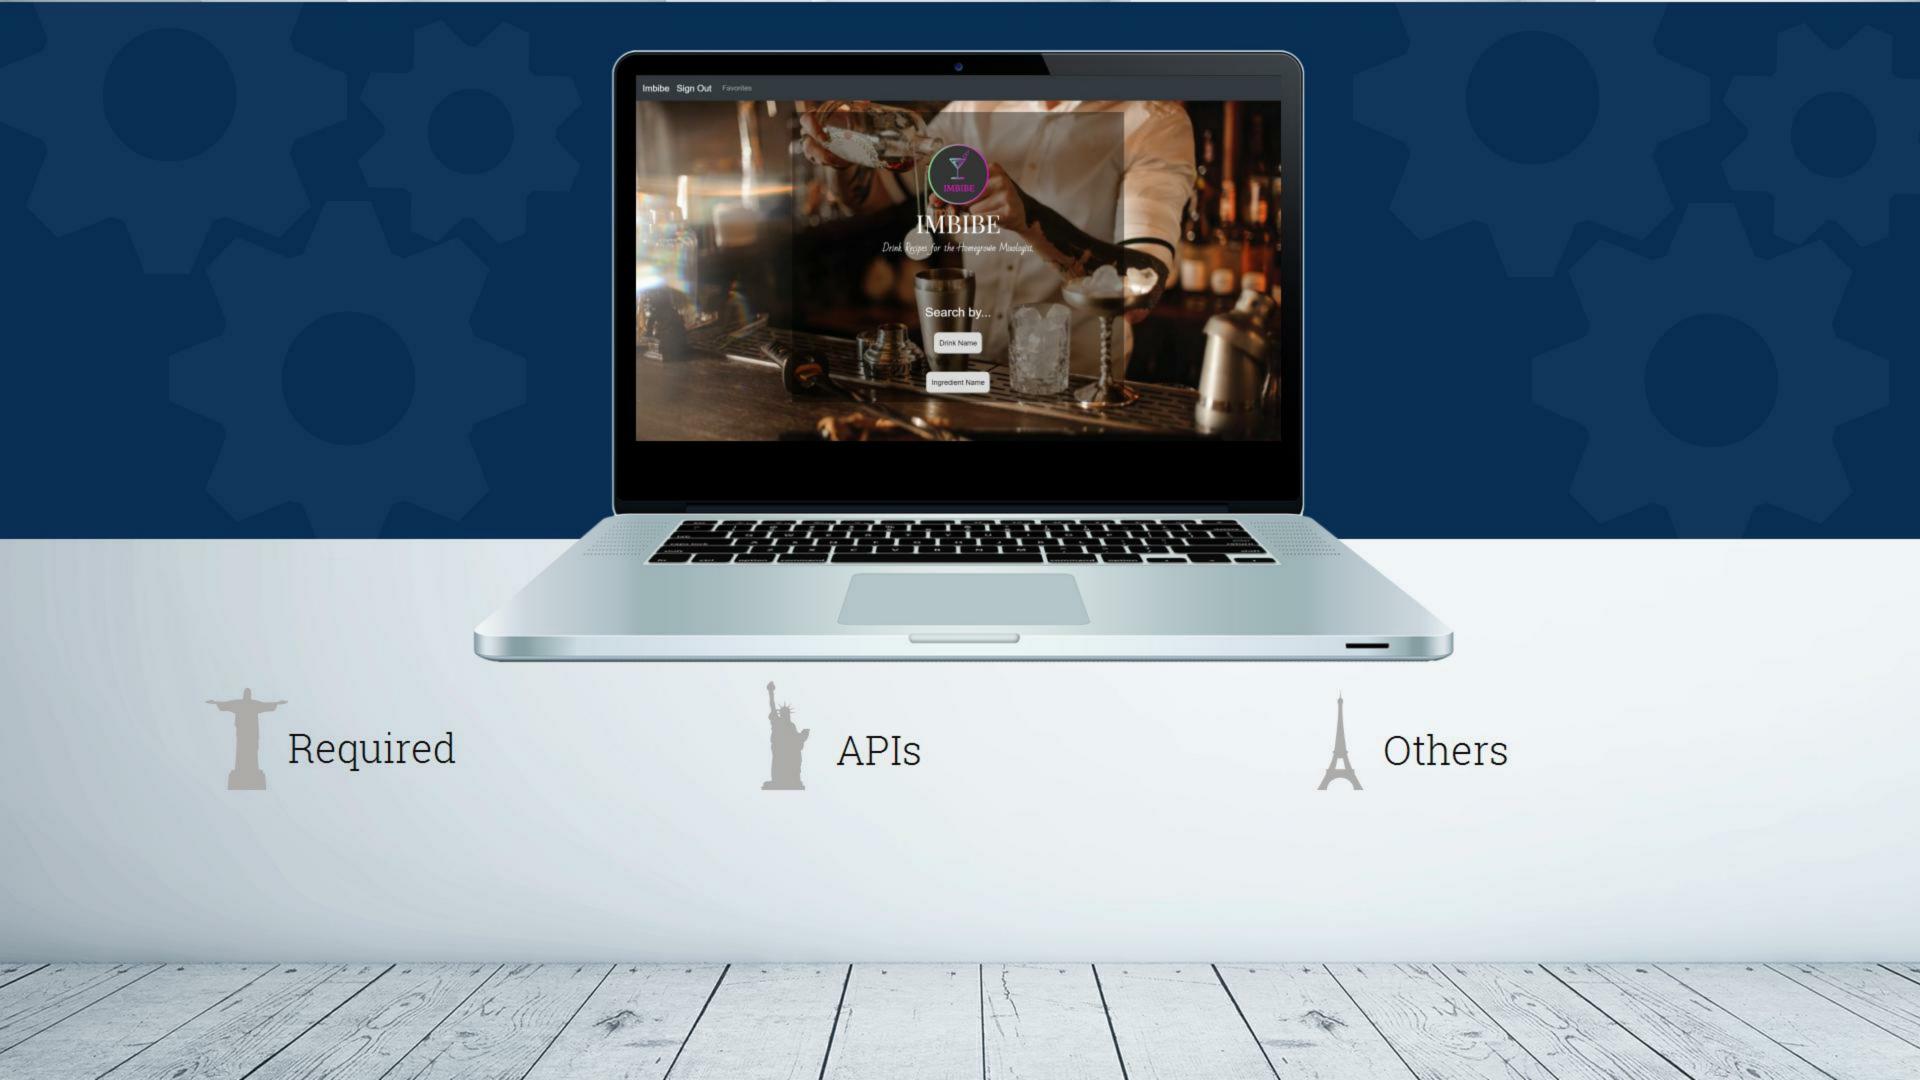

Search Option

User can search specific drinks or ingredients to narrow their search for their perfect drink.

Recipes

Drink recipes are provided along with what glass the drink should be served in as an added bonus.
